Network Diagnostics Tools Assignment

Note: Actual command outputs and screenshots must be captured on your own computer.

1. ipconfig Command

Open Command Prompt and run: ipconfig

Record your IPv4 Address: _____

Record your Default Gateway: _____

Screenshot Placeholder: Insert ipconfig screenshot here.

2. ping Command

Run: ping www.google.com

Average Response Time: _____ ms

3. tracert Command

Run: tracert www.flipkart.com

Number of Hops to Destination: _____

4. nslookup Command

Run: nslookup www.spotify.com

IP Address Returned: _____

Purpose: nslookup verifies whether DNS is correctly translating a domain name into an IP address.

5. Troubleshooting Zomato Website Access

Command	Purpose
ipconfig	Check local IP configuration, gateway and network settings.
nslookup zomato.com	Verify DNS resolution of the website domain.
ping zomato.com	Test connectivity between the laptop and the destination site.

If ping fails but DNS resolves correctly, run tracert zomato.com to identify where the network path is failing.
